WORKSHOP

What will the future university look like in 20 years?

11|05
2022
ORE 9.30 | 13.00

**Aula seminari
Santa Teresa**
via della Mattonaia, 8
Firenze

In this workshop, we use the basics of **systems thinking** and **design thinking** to tackle this question. In the first part of the program in a dialog with the participants, we **explore the sustainability definition** and introduce them to the systems thinking applied to complex challenges of sustainability. In the second part, we **introduce and apply different methods and tools to create the future vision of the university that includes all aspects of sustainability, from energy and material use, ecosystems, to culture, health, and wellbeing.** We start by developing our vision for a sustainable university, then we set the goals and strategies in the present day and map the roadmap to the future.

PARTICIPANTS

max 15 -20
from different backgrounds: students, Ph.D. students, researchers, etc.
